The following groups of students are required to have student health insurance that meets the minimum standards set by the University System of Georgia (USG). Students in these groups will be charged a Mandatory Student Health Insurance premium by the Bursar’s Office. Students who are covered by an existing policy that meets the USG requirements may submit an online waiver. Eligible dependents of enrolled students may participate in the insurance plan but must enroll during open enrollment as they are not charged on tuition or automatically renewed for coverage.

- All undergraduate and graduate students enrolled in programs that require proof of health insurance as determined by the USG Institution. Currently Georgia Tech only requires Mandatory Health Insurance for graduate students in the CHBE and BMED programs and APPH majors.
- All graduate students receiving fellowships that fully fund their tuition as determined by the USG Institution.
- All undergraduate, graduate students holding F or J visas.
- All graduate students receiving a Tuition Waiver as part of their graduate assistantship award as determined by the USG Institution.

Students who fall into one of these categories and are already covered by an insurance policy (i.e. through parent plan, family plan or employer-sponsored plan) can easily opt out of the plan through a secure on-line process. Once the information has been verified, all charges will be removed from your student account. Students listed in the above categories who fail to submit creditable health insurance information will automatically be enrolled in and billed for the system-wide student health insurance plan.
